Reading order: Pages 3-11 explain the core game functions. Use the following pages when Skill symbols, Response, Attachment, Casting, Status, or Healing appear.

Card terminology: Hero, Skill, Attack, Response, Attachment, Legacy, Tribute, Rank Up, Shard Deck, Shard Pool, Mana Shard, and Class Shard use the same terms printed in the game components.

GAME BASICS

1. Understanding Grandis Legacy and the Battlefield

Grandis Legacy is an RPG-Style TCG focused on Hero progression, tactical positioning, Class-based play, and Legacy after defeat. The standard format in this rulebook uses 3 Heroes per player.

Primary win condition
Defeat all 3 opposing Heroes.

Deck-out
If the Main Deck is empty and the mandatory Draw Phase draw cannot be performed, that player loses.

Two separate conditions: Defeating all 3 opposing Heroes is how you win. Maintaining your Main Deck prevents a deck-out loss.

Area	Function	Area	Function
Hero Left / Center / Right	Holds a Hero or Legacy.	Attachment Slot	Two active-effect slots per Hero.
Legacy Deck	Hero Rank I-III and Legacy Cards.	Racial Token	Used for Racial Traits.
Main Deck	Source of Skill, Item, and Event cards.	Discard Pile	Holds resolved or discarded cards.
Shard Deck	12 Shards used to supply the Shard Pool.	Shard Pool	Holds available Shards.
Hand	A player's private cards.		

Legacy Deck
Three Hero progression packages. Each package contains Hero Rank I, Rank II, Rank III, and 1 Legacy Card.

Shard Deck
Exactly 12 Shards. Its Class Shards are determined by the selected Ultimate Cards; remaining slots are Mana Shards.

BEFORE PLAY

2. Setup, Turn Structure, and Mana

Game Setup

- 1
- Choose three Hero packages for the Legacy Deck.
- 2
- Place Hero Rank I in Left, Center, and Right.
- 3
- Shuffle the Main Deck.
- 4
- Build and shuffle the 12-card Shard Deck.
- 5
- Draw 6 cards as your Opening Hand.
- 6
- Draw 3 starting Shards from the Shard Deck into the Shard Pool.
- 7
- Start with Mana Regen 1 and 2 Racial Tokens.
- 8
- Determine the first player and begin at the Draw Phase.

Section	Rule
Main Deck	60 cards: Skill, Item, and Event. Any mix allowed.
Legacy Deck	12 cards: three Hero and Legacy packages.
Shard Deck	12 Shards. See page 5 for composition and cycling.
Copy limit	Normal cards: maximum 3 copies; Ultimate: maximum 1 copy.
Hand limit	Maximum 8 at the end of the turn.

Turn Structure

Phase	Main function
Draw	Ready Heroes; mandatory Main Deck Draw; resolve draw replacement if any; then Mana Regen.
Deploy	Tactical, Item, Event, Ability, Racial Trait, Legacy Ability, Reposition.
Battle	Attack, Response, and any Casting that is ready.
Reform	Support, Tribute, Legacy Ability, Reposition.
End	Resolve Status/end-of-turn effects; reduce Hand to 8; pass turn.

Timing: cards can only be used during the phase or timing stated on the card. The first player cannot attack during their first turn.

BEFORE PLAY

2. Shard Deck and Shard Pool

Mana Shard

Warrior Class Shard

Mage Class Shard

Archer Class Shard

Cleric Class Shard

Thief Class Shard

Shard Deck Composition
Shard Deck contains exactly 12 Shards. Create 1 Class Shard for each unique Class represented by the deck's selected Ultimate Cards, maximum 1 Class Shard per Class and 3 Class Shards total. Fill every remaining slot with Mana Shards, then shuffle the Shard Deck.

Shard	Value
Mana Shard	1 Mana.
Matching Class Shard	2 Mana when paying for a Skill of the same Class.
Nonmatching Class Shard	1 Mana. For Item/Event and other non-Skill payments, Class Shards are also 1 Mana.

Mana Regen: starts at 1. Each Rank Up increases Mana Regen by 1, to a maximum of 6. During Draw Phase, after the Main Deck Draw and any draw-review replacement finishes, take Shards from the top of the Shard Deck into the Shard Pool equal to Mana Regen, up to the normal Shard Pool maximum of 12.

Paying Mana
For a Skill payment, if Class Shards are available, the player may choose which Class Shards to use before Mana Shards fill the remaining cost. For Item, Event, and other non-Skill payments, Mana Shards are used first; Class Shards are used only if Mana Shards are insufficient, and each is worth 1 Mana.

Shard Return Cycle
Used Shards do not go to Discard. Each payment/use returns as one batch to the bottom of its owner's Shard Deck. Within a Skill payment batch, Mana Shards return first, nonmatching Class Shards next, and the matching Class Shard returns deepest/last. A later payment batch is placed below the entire earlier batch.

Opponent Shard Selection
When an effect makes you discard, remove, or otherwise choose a Shard from an opponent's Shard Pool, choose from that opponent's Shards face-down / by card back without knowing the Shard's identity before the choice is committed. Resolve what happens to the selected Shard exactly as stated by the card or effect.

CORE RULES

3. Heroes and Combat Basics

Each player has Left, Center, and Right positions. Area of Attack determines which opposing positions can be selected by a normal Attack based on the attacking Hero's position.

Attacker position	Normal targets
Left	Left or Center
Center	Left, Center, or Right
Right	Center or Right

Range Attack
An Attack that is not restricted by the normal Area of Attack based on Hero position.

Area Attack
Affects all opposing Heroes within the user Hero's Area of Attack without choosing targets one by one.

Targets and Special Attacks

- All non-Area Attacks must choose a target unless the card determines its own target or states that it does not use one.
- The number of targets follows the card text.
- An Attack that selects multiple positions gives each affected Hero a separate Response opportunity.
- Legacy is not a Hero target unless a card specifically targets a position and allows Legacy.

How to Use an Attack Skill

- 1 Choose an Attack Skill from Hand.
- 2 Choose a Hero that meets Class, Rank, and other requirements.
- 3 Choose a legal target if required.
- 4 Confirm, pay Mana, and Exhaust the Hero if required.
- 5 The opponent receives a Response opportunity.
- 6 Resolve damage and effects.

Reposition

Reposition swaps two adjacent positions. Left is adjacent to Center; Right is adjacent to Center.

Swap	Result
Hero <-> Hero	Both become Exhausted.
Hero <-> Legacy	Only the Hero becomes Exhausted.
Legacy <-> Legacy	Not legal.

HP, EXP, Status, Attachment, Casting, and Exhaust move with the Hero. Reposition from a card effect does not automatically Exhaust unless stated.

Manual Reposition limit: a normal/manual Reposition may be used at most once during one active turn. Deploy and Reform share this limit. Reposition caused by a card/effect does not use this limit.

Automatic Center - 1v1: when each player has exactly 1 active non-Legacy Hero remaining, both active Heroes automatically move to Center. This movement does not Exhaust them. A Legacy or empty object occupying Center swaps out as part of this automatic move.

GRANDIS LEGACY

POSITIONING SYSTEM

CHOOSE YOUR POSITION. CONTROL THE BATTLEFIELD.

CORE RULE

Heroes fight as part of battlefield formation.
Your position determines which enemy Heroes you can attack.

1 BASIC POSITIONS

2 ATTACK RANGE

→ = CAN ATTACK X = CANNOT ATTACK

3 POSITION TRADE-OFFS

POSITION IS POWER. STRATEGY IS VICTORY.

LEGACY DECK - HERO

5. Reading a Hero Card and Exhaust

Exhaust and Racial Token

Ready

A Hero can perform legal active actions.

Return to Ready

A Hero normally becomes Ready during its owner's Draw Phase. A Hero that is still Casting remains Exhausted.

Normal Skill Exhaust

After a successful normal Skill use, its source Hero becomes Exhausted unless the card/effect explicitly says otherwise. Item Cards do not Exhaust a Hero by default.

Racial Token

Maximum pool: 2. A player may use at most 1 Racial Token during one active turn.

While Exhausted

A legal Racial Trait can still be used while the Hero is Exhausted, unless the card states otherwise.

HERO PROGRESSION

6. Tribute and Rank Up

Tribute

Tribute converts 1 Skill Card from Hand into EXP for a chosen Hero.

Choose Skill Card

Choose Hero

Place Skill beneath Hero as EXP

Tribute rule	Explanation
Timing	Reform Phase.
Limit	Maximum 1 normal Tribute each Reform Phase.
Printed Mana Cost	Not paid.
EXP value	Normal Skill = 100 EXP. Ultimate = 200 EXP.
Ultimate requirement 1	Only to the specific living Hero owner stated/encoded by that Ultimate Card.
Ultimate requirement 2	Spend 1 Class Shard matching the Ultimate Card Class from Shard Pool.
Ultimate Class Shard	Returns to the bottom of its owner Shard Deck after use.

Ultimate Tribute: both requirements must be satisfied at the same time. The Ultimate's printed Mana Cost is still ignored.

Rank Up

When a Hero's total EXP reaches the requirement for the next Rank, replace that Hero Card with the corresponding Rank card.

EXP	New Rank	Rank Up Bonus
300	Rank II	Draw 2 cards and Mana Regen +1.
700	Rank III	Draw 3 cards and Mana Regen +1.

When Ranking Up
Whether from Rank I to II or Rank II to III, move all EXP Cards beneath the Hero to Discard, then replace the Hero with the next Rank card. Damage already taken still counts against the new Max HP. Status, Attachment, Casting, and Exhaust remain with the Hero. Shard Pool does not increase immediately.

LEGACY DECK

7. Legacy Cards, Defeat, and Revive

What is a Legacy?

When a Hero is defeated, choose any available/legal Legacy Card whose Base Class matches that Hero's Base Class (Rank I Class) to occupy the position. It does not have to come from that Hero's original package. Legacy is not a Hero and has no HP, Class, Rank, EXP, Status, Exhaust, or Attachment Slot.

Main purpose of Legacy: after a Hero is defeated, some Skill Cards may no longer be playable. Legacy lets matching Skill Cards remain useful as costs: discard the required Skill Card from Hand without paying Mana, then resolve the Legacy Ability.

Legacy Timing: a Legacy Ability can only be used during Deploy or Reform. Each Legacy can use its Ability once per turn and does not become Exhausted.

Using a Legacy Ability

Choose Legacy > Pay the matching Skill Card > Choose card/target if required > Resolve the Ability

Hero Defeated and Revive

When defeat occurs

- Attachments go to Discard.
- Status is cleared.
- All EXP Cards beneath the defeated Hero go to Discard.
- Pending Casting from that Hero is canceled and its Casting card goes to Discard.
- The Hero keeps the Rank it had reached; after EXP Cards are cleared, only that Rank's inherent EXP remains (Rank I 0 / Rank II 300 / Rank III 700).
- If all three Heroes are defeated, that player loses.

Revive

- Legacy returns to the Legacy Deck.
- The Hero returns to that position.
- HP, EXP, Status, and Exhaust follow the revive card.

MAIN DECK

8. Main Deck and Reading a Skill Card

The Main Deck contains 60 cards consisting of Skill, Item, and Event Cards. Players may choose any mix. A resolved card normally goes to Discard unless it becomes an Attachment or another effect moves it elsewhere.

Lineage and Fallback Effect

A Hero may use Skills from earlier Classes in the same progression Lineage. Use the effect row that matches the Hero's Class and Rank. If there is no exact row, use the highest previous effect row available in that Lineage, as long as the Hero still meets the card requirements.

Example: A Conqueror Rank III may still use Deflect from the Warrior > Gladiator > Conqueror Lineage. Because Deflect has Warrior Rank I and Gladiator Rank II rows, use the Gladiator Rank II effect.

What Counts as a Draw?

A Draw is a successful movement of a card from the top of the Main Deck to Hand caused by a Draw rule or effect. Mandatory Draw Phase draws, card-effect draws, Rank Up reward draws, and replacement/redraw effects count when they actually draw from the top of Main Deck. Opening Hand, search/choose/add-specific-card-to-Hand, and return-from-Discard-to-Hand do not count as Draw.

A Draw effect takes as many cards as are available, including 0, without causing an immediate loss. Deck-out loss occurs only when the mandatory Draw Phase draw cannot be performed.

Check before playing a Skill: Mana Cost, Skill type, timing, Class, Rank, Lineage, target, and effect text.

CARD SYMBOLS

9. Skill Symbols, Skill Types, Items, and Events

**Physical Attack**

Must choose a target within Area of Attack and deals Physical damage.

**Magical Attack**

Must choose a target within Area of Attack and deals Magical damage.

**Area Attack**

Affects all opposing Heroes within Area of Attack without choosing targets one by one.

**Range Attack**

Must choose a target, but ignores the normal Area of Attack restriction from Hero position.

**Casting Attack**

Choose the target position when played. That position remains locked until Casting resolves during the Battle Phase.

**Defend Skill**

Used during Response for Block, Dodge, Negate, redirect, or other protection.

**Support Skill**

Healing, recovery, or other assistance for a Hero. Timing follows the card.

**Tactical Skill**

Preparation, Reposition, buff, draw, or disruption. Timing follows the card.

Targets

The number of targets follows the text on the card.

General Skill Timing

Type	General timing	Function
Attack	Battle Phase	Attack opposing Heroes.
Defense	During Response	Protect a Hero or stop an Attack.
Tactical	Deploy Phase or as stated	Prepare strategy and change the game state.
Support	Deploy or Reform as stated	Healing, recovery, or other assistance.

Item Card

Provides healing, buffs, modifiers, or special functions. It may resolve immediately or become an Attachment if its effect remains active.

Event Card

Represents an event that affects the game. It does not always require a Hero as the user.

RESOLVING ACTIONS

10. Response, Attachment, and Casting

Area and multi-target: each affected Hero receives its own Response opportunity.

Defense result	Meaning
Block	Reduces damage, including down to 0.
Dodge	The Hero avoids the Attack.
Redirect	Changes the Attack target according to the card text.

Committed Response and additional cost: all required additional costs must be payable before the Response is available. When the player confirms the Response, that Response becomes committed and the previous Response Window closes. Any mandatory additional-cost selection is then completed before the chain continues. The player cannot cancel the committed Response after this point.

Attachment

- Each Hero has 2 Attachment Slots.
- A card becomes an Attachment if its effect remains active after being played and must persist for later timing.
- An effect that resolves immediately is not placed in an Attachment Slot.
- A slot must be available before playing a card that requires an Attachment.
- Attachments move with the Hero during Reposition.
- Use the card's counter to track remaining turns/uses as instructed.
- When the effect ends, is used up, or the Hero is defeated, the card goes to Discard.

Casting

Casting locks a target position, not a Hero. Choose an opposing position when Casting is played; when released, it hits the Hero currently occupying that position.

- If the target position contains Legacy when Casting is released, the Attack resolves without dealing damage.
- All Casting releases only during Battle Phase.
- Casting uses an Attachment Slot and makes the user Hero Exhausted.
- If the user Hero changes position or is affected by Stun before release, the Casting is canceled.
- Normal Casting reduces its counter at the start of the next Battle Phase.
- When the counter reaches 0 during Battle Phase, the Attack is released and the opponent receives a Response.
- After Casting resolves, the user Hero remains Exhausted until the next Draw Phase.

SUPPORT REFERENCE

11. Status and Healing

Status remains attached to a Hero and moves with it during Reposition. Legacy cannot receive Hero Status.

Status	Effect
Bleed	The Hero cannot receive healing while Bleed is active. Bleed does not deal additional damage.
Burn	If a Hero with Burn takes damage from an Attack, that Attack deals 10 additional damage.
Freeze	The Hero cannot change position through normal Reposition or Skill effects, and cannot use Dodge.
Poison	Deals 10 damage during the owner Hero's End Phase for each turn of its duration.
Stun	The Hero cannot be chosen as the user/source of a Skill, Item, Event, Ability, or active effect while Stun remains active.

Status Duration: duration decreases during the owner Hero's End Phase and ends at 0. Poison deals damage before its duration decreases.

Status Stacking: applying Poison, Burn, Freeze, or Stun again adds the new duration to the remaining duration. Reapplying Bleed does not add duration; keep whichever duration is higher.

Healing

- Healing cannot exceed Max HP.
- Single-target healing requires a damaged Hero without Bleed.
- For multi-target healing, full-HP Heroes, defeated Heroes, and Heroes with Bleed are skipped.
- Apply Healing Done and Healing Received modifiers when applicable.

Note: Taunt is an Attachment effect that restricts Attack choices; it is not one of the Status effects listed above.

QUICK REFERENCE

12. Quick Reference

Topic	Short rule
Win	Defeat all 3 opposing Heroes.
Deck-out	Lose only when the mandatory Draw Phase Main Deck draw cannot be made.
Turn	Draw > Deploy > Battle > Reform > End.
Area of Attack	Left: Left/Center; Center: all; Right: Center/Right.
Manual Reposition	Maximum 1 per active turn; Deploy/Reform share the limit; effect Reposition is exempt.
1v1 Auto Center	With exactly 1 active non-Legacy Hero on each side, both automatically move to Center without Exhaust.
Shard Deck	Exactly 12 Shards; Class Shards follow unique Classes from selected Ultimate Cards (max 1/Class, max 3 total); remainder Mana Shards.
Starting Mana	Opening Hand 6 first, then draw 3 Starting Shards. Mana Regen starts at 1.
Mana value	Mana Shard = 1. Matching Class Shard = 2 for matching Skill; otherwise Class Shard = 1.
Shard return	Each payment returns as a batch: Mana -> nonmatching Class -> matching Class; later batches go below earlier batches.
Opponent Shard	Choose opponent Shards face-down whenever an effect discards, removes, or selects a Shard from their Shard Pool.
Tribute	Normal Skill = 100 EXP. Ultimate = 200 EXP and requires both its specific Hero owner + matching Class Shard.
Rank Up	300 EXP -> Rank II; 700 EXP -> Rank III; all EXP Cards go to Discard on Rank Up.
Defeat EXP	EXP Cards go to Discard; reached Rank is retained with inherent Rank EXP.
Draw	Only a successful top-of-Main-Deck -> Hand Draw counts. Opening Hand/search/Discard return are not Draw.
Attachment	2 slots per Hero; used when an effect remains active after the card is played.
Legacy	On defeat choose any available Legacy with matching Base Class; Legacy Ability is used during Deploy/Reform.
Racial Token	Maximum 2; use at most 1 during one active turn.

Three Main Flows

Attack	Choose card > choose Hero > choose target > pay Mana > Response > resolve.
Rank Up	Tribute > gain EXP > reach 300/700 > EXP Cards to Discard > replace Hero > gain bonus.
Defeat	HP 0 > check defeat prevention > clear connected state > choose matching-Base-Class Legacy.

Hand and Search

- Hand is private.
- After searching or viewing the Main Deck, shuffle it unless a card states otherwise.
- A Draw effect takes as many cards as available, including 0, without immediate loss.
