Reading order

Pages 3-10 explain the core game functions. Use the following pages when Skill symbols, Response, Attachment, Casting, Status, or Healing appear.

Card terminology

Hero, Skill, Attack, Response, Attachment, Legacy, Tribute, and Rank Up use the same terms printed on the cards.

GAME BASICS

1. Understanding Grandis Legacy and the Battlefield

Grandis Legacy is a Trading Card Game built around 3 Hero vs 3 Hero battles. Players manage Hero positions, use cards from the Main Deck, Rank Up, and use Legacy to maintain their strategy after a Hero is defeated.

Primary win condition

Defeat all 3 opposing Heroes.

How to avoid losing to deck-out

If the Main Deck is empty and the mandatory Draw Phase draw cannot be performed, that player loses.

Two separate conditions

Defeating all 3 opposing Heroes is how you win. Maintaining your Main Deck prevents you from losing when a mandatory Draw Phase draw cannot be made.

Area	Function	Area	Function
Hero Left / Center / Right	Holds a Hero or Legacy.	Main Deck	Source of Skill, Item, and Event cards.
Attachment Slot	Two active-effect slots per Hero.	Discard Pile	Holds resolved or discarded cards.
Legacy Deck	Hero Rank I-III and Legacy Cards.	Mana Pool	Holds available Mana Shards.
Racial Token	Used for Racial Traits.	Hand	A player's private cards.

Legacy Deck

Three Hero progression packages. Each package contains Hero Rank I, Rank II, Rank III, and 1 Legacy Card.

Main Deck

Contains Skill, Item, and Event Cards. The Main Deck is shuffled and supplies cards to the Hand.

BEFORE PLAY

2. Setup, Turn Structure, and Mana

Game Setup

- 1
- Choose three Hero packages for the Legacy Deck.
- 2
- Place Hero Rank I in Left, Center, and Right.
- 3
- Shuffle the Main Deck.
- 4
- Draw 6 cards as your opening hand.
- 5
- Start with 0 Mana Shards, Mana Regen 2, and 2 Racial Tokens.
- 6
- Determine the first player and begin at the Draw Phase.

Section	Rule
Main Deck	60 cards: Skill, Item, and Event. Any mix allowed.
Legacy Deck	12 cards: three Hero and Legacy packages.
Copy limit	Normal cards: maximum 3 copies; Ultimate: maximum 1 copy.
Hand limit	Maximum 8 at the end of the turn.

Turn Structure

DRAW	DEPLOY	BATTLE	REFORM	END
Phase	Main function			
Draw	Ready Heroes, draw 1 mandatory card, then gain Mana.			
Deploy	Tactical, Item, Event, Ability, Racial Trait, Legacy Ability, Reposition.			
Battle	Attack, Response, and any Casting that is ready.			
Reform	Support, Tribute, Legacy Ability, Reposition.			
End	Resolve Status/end-of-turn effects; reduce Hand to 8; pass turn.			

Mana Pool and Mana Shard

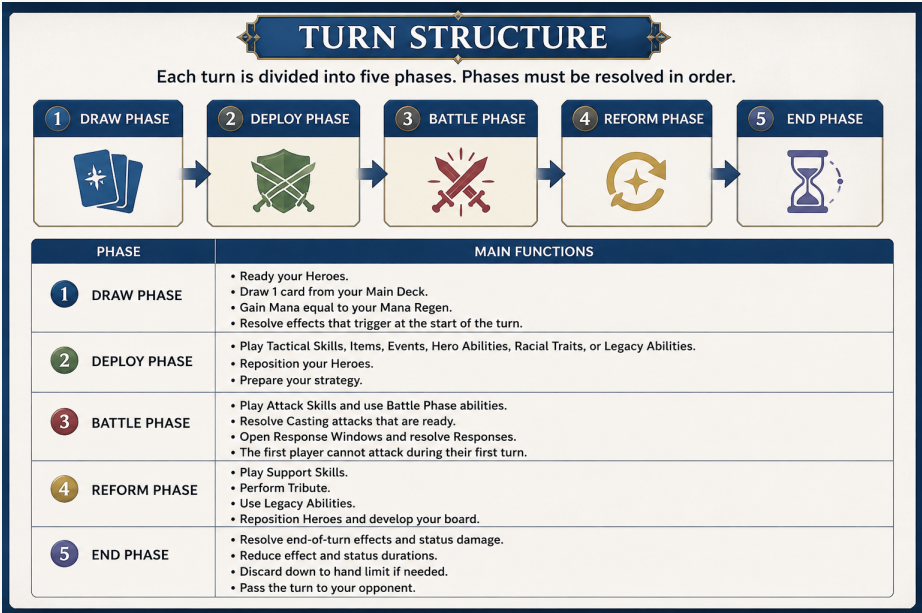

Mana Shards pay for cards and abilities. Available Mana is stored in the Mana Pool.

Mana Pool	Maximum 12.
Mana Cost	Amount of Mana paid.
Mana Regen	Gain during Draw Phase; can increase to 6.

Timing: cards can only be used during the phase or timing stated on the card.

The first player cannot attack during their first turn.

CORE RULES

3. Heroes and Combat Basics

Formation and Area of Attack

Each player has Left, Center, and Right positions. Area of Attack determines which opposing positions can be selected by a normal Attack based on the attacking Hero's position.

Attacker position	Normal targets
Left	Left or Center
Center	Left, Center, or Right
Right	Center or Right

Range Attack

An Attack that is not restricted by the normal Area of Attack based on Hero position.

Area Attack

Does not select targets one by one. The Attack affects all opposing Heroes within the user Hero's Area of Attack.

Targets and Special Attacks

- All non-Area Attacks must choose a target, unless the card determines its own target or states that it does not use a target.
- The number of targets follows the card text.
- An Attack that selects multiple positions follows the card choices; each affected Hero receives a separate Response opportunity.
- Legacy is not a Hero target unless a card specifically targets a position and allows Legacy.

How to Use an Attack Skill

1. Choose an Attack Skill from Hand.
2. Choose a Hero that meets the card's Class, Rank, and other requirements.
3. Choose a legal target if required.
4. Confirm, pay Mana, and Exhaust the Hero if required.
5. The opponent receives a Response opportunity.
6. Resolve the card's damage and effects.

Reposition

Reposition swaps two adjacent positions. Left is adjacent to Center; Right is adjacent to Center.

Swap	Result
Hero <-> Hero	Both become Exhausted.
Hero <-> Legacy	Only the Hero becomes Exhausted.
Legacy <-> Legacy	Not legal.

HP, EXP, Status, Attachment, Casting, and Exhaust move with the Hero. Reposition from a card effect does not automatically Exhaust unless stated.

Position impact

Hero position limits Attack targets during the Battle Phase. Card use outside the Battle Phase is not position-restricted unless a card states otherwise.

GRANDIS LEGACY

POSITIONING SYSTEM

CHOOSE YOUR POSITION. CONTROL THE BATTLEFIELD.

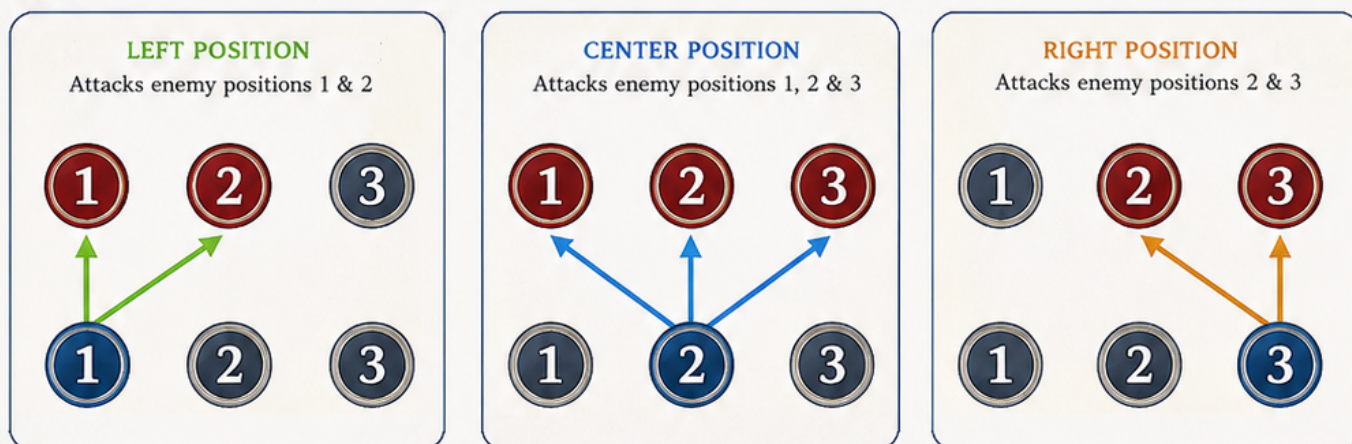

CORE RULE

Heroes fight as part of battlefield formation.
Your position determines which enemy Heroes you can attack.

1 BASIC POSITIONS

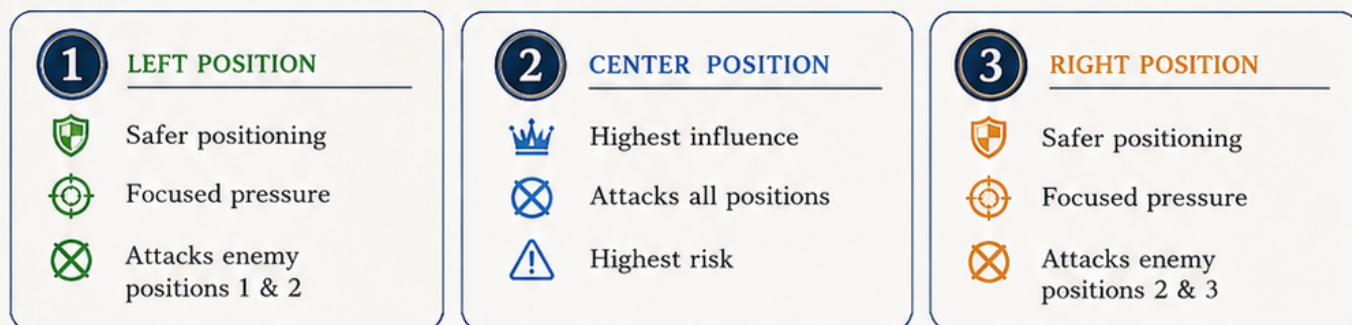

2 ATTACK RANGE

→ = CAN ATTACK X = CANNOT ATTACK

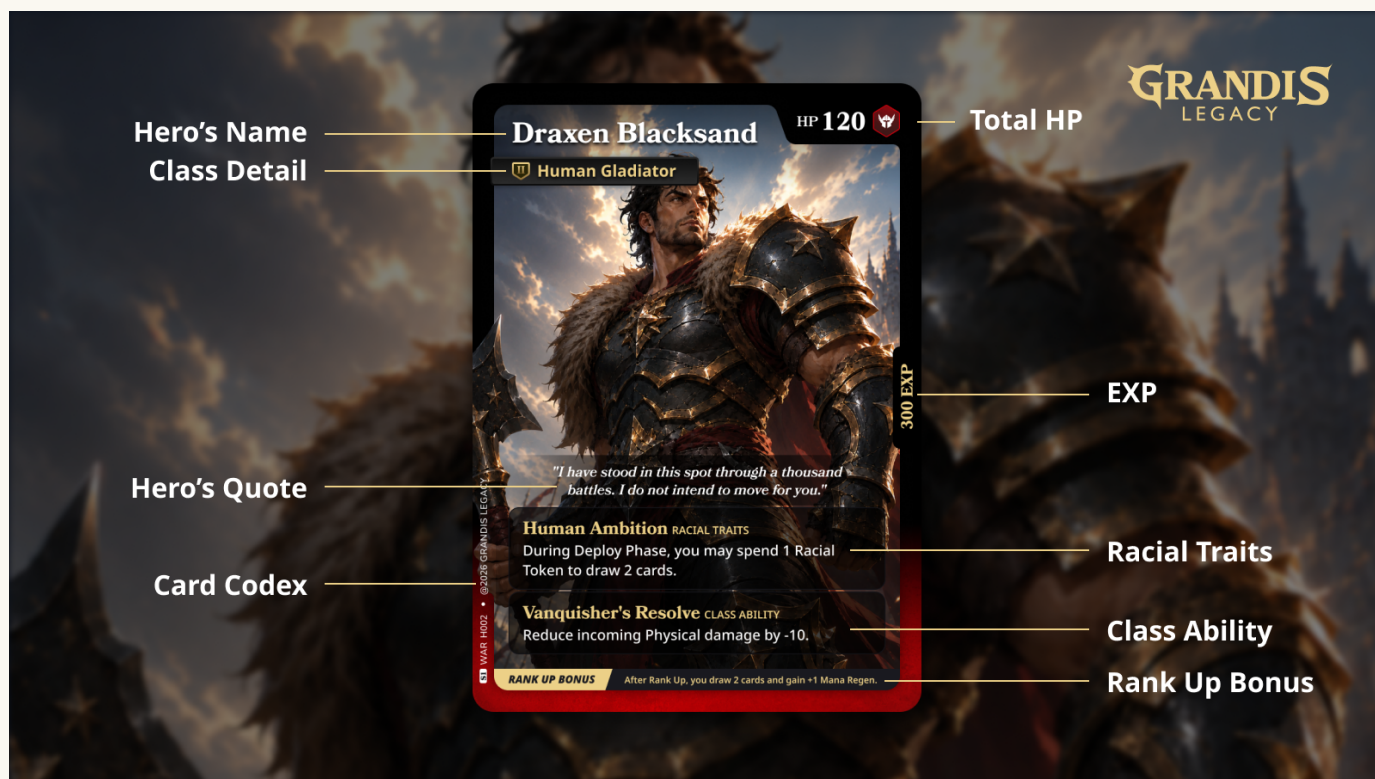

3 POSITION TRADE-OFFS

POSITION IS POWER. STRATEGY IS VICTORY.

LEGACY DECK - HERO

5. Reading a Hero Card and Exhaust

Exhaust and Racial Token

Ready

A Hero can perform legal active actions.

Exhausted: rotate the Hero 90 degrees. The Hero cannot perform normal active actions.

Return to Ready

A Hero normally becomes Ready during its owner's Draw Phase. A Hero that is still Casting remains Exhausted.

Racial Token

Maximum pool: 2. A player may use at most 1 Racial Token during one active turn.

While Exhausted

A legal Racial Trait can still be used while the Hero is Exhausted, unless the card states otherwise.

HERO PROGRESSION

6. Tribute and Rank Up

Tribute

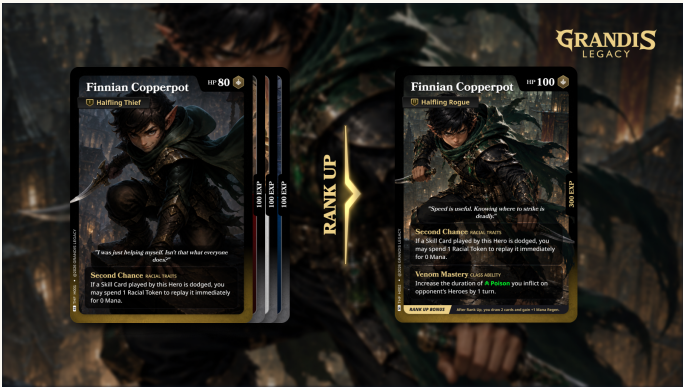

Tribute converts 1 Skill Card from Hand into EXP for a chosen Hero.

Tribute rule	Explanation
Timing	Reform Phase.
Limit	Maximum 1 normal Tribute each Reform Phase.
Mana	The Skill's Mana Cost is not paid.
EXP value	Normal Skill = 100 EXP. Ultimate = 200 EXP.
Ultimate	Can only be given to the Hero owner stated on the card.

Rank Up

When a Hero's total EXP reaches the requirement for the next Rank, replace that Hero Card with the corresponding Rank card.

EXP	New Rank	Rank Up Bonus
300	Rank II	Draw 2 cards and Mana Regen +1.
700	Rank III	Draw 3 cards and Mana Regen +1.

When Ranking Up

Whether from Rank I to Rank II or Rank II to Rank III, move all EXP Cards beneath the Hero to the Discard Pile. Then replace the Hero with the next Rank card. Damage already taken still counts against the new Max HP. Status, Attachment, Casting, and Exhaust remain with the Hero. The Mana Pool does not increase immediately.

Reducing EXP does not lower a Hero's Rank. A Rank III Hero cannot Rank Up again.

LEGACY DECK

7. Legacy Cards, Defeat, and Revive

What is a Legacy?

When a Hero is defeated, choose a legal Legacy Card that matches that Hero's Base Class (Rank I Class) to occupy the position. Legacy is not a Hero. It has no HP, Class, Rank, EXP, Status, Exhaust, or Attachment Slot. Legacy cannot be targeted as a Hero, but it can swap positions with a Hero.

Main purpose of Legacy

After a Hero is defeated, some Skill Cards tied to that Hero may no longer be playable. Legacy keeps those Skill Cards useful as costs: discard the required Skill Card from Hand without paying Mana, then resolve the Legacy Ability.

Legacy Timing

Timing

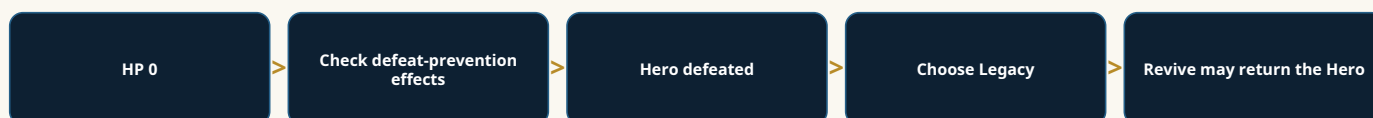

A Legacy Ability can only be used during the Deploy Phase or Reform Phase. Each Legacy can use its Ability once per turn and does not become Exhausted.

Using a Legacy Ability

Follow the cost, target, and result printed on the Legacy Card. Reveal a card chosen from the Main Deck or Discard if the Ability requires it. After searching the Main Deck, shuffle it.

Hero Defeated and Revive

When defeat occurs

- Attachments go to Discard.
- Status is cleared.
- EXP Cards move according to the defeat rules.
- If all three Heroes are defeated, that player loses.

Revive

- Legacy returns to the Legacy Deck.
- The Hero returns to that position.
- HP, EXP, Status, and Exhaust follow the revive card.

MAIN DECK

8. Main Deck and Reading a Skill Card

The Main Deck contains 60 cards consisting of Skill, Item, and Event Cards. Players may choose any mix of those card types. A resolved card normally goes to Discard, unless it becomes an Attachment or another effect moves it elsewhere.

Lineage and Fallback Effect

Lineage

A Hero may use Skills from earlier Classes in the same progression Lineage. Use the effect row that matches the Hero's Class and Rank. If there is no exact row, use the highest previous effect row available in that Lineage, as long as the Hero still meets the card requirements.

Example

A Conqueror Rank III may still use Deflect from the Warrior > Gladiator > Conqueror Lineage. Because Deflect has Warrior Rank I and Gladiator Rank II rows, use the Gladiator Rank II effect.

Check before playing a Skill: Mana Cost, Skill type, timing, Class, Rank, Lineage, target, and effect text.

CARD SYMBOLS

9. Skill Symbols, Skill Types, Items, and Events

**Physical Attack**

Must choose a target within Area of Attack and deals Physical damage.

**Magical Attack**

Must choose a target within Area of Attack and deals Magical damage.

**Area Attack**

Affects all opposing Heroes within Area of Attack without choosing targets one by one.

**Range Attack**

Must choose a target, but ignores the normal Area of Attack restriction from Hero position.

**Casting Attack**

Choose the target position when played. That position remains locked until Casting resolves during the Battle Phase.

**Defend Skill**

Used during Response for Block, Dodge, Negate, redirect, or other protection.

**Support Skill**

Healing, recovery, or other assistance for a Hero. Timing follows the card.

**Tactical Skill**

Preparation, Reposition, buff, draw, or disruption. Timing follows the card.

Targets

The number of targets follows the text on the card.

General Skill Timing

Type	General timing	Function
Attack	Battle Phase	Attack opposing Heroes.
Defense	During Response	Protect a Hero or stop an Attack.
Tactical	Deploy Phase or as stated	Prepare strategy and change the game state.
Support	Deploy or Reform as stated	Healing, recovery, or other assistance.

Item Card

Provides healing, buffs, modifiers, or special functions. It may resolve immediately or become an Attachment if its effect remains active.

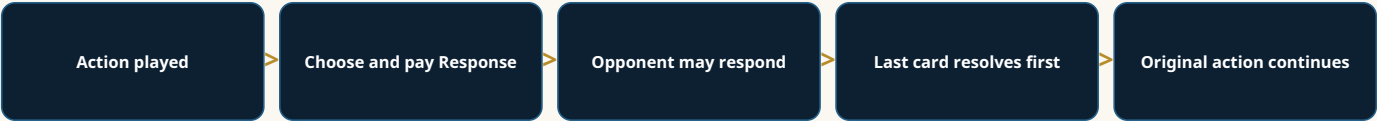

Event Card

Represents an event that affects the game. It does not always require a Hero as the user.

RESOLVING ACTIONS

10. Response, Attachment, and Casting

Response Sequence

Area and multi-target
Each affected Hero receives its own Response opportunity.

Defense result	Meaning
Block	Reduces damage, including down to 0.
Dodge	The Hero avoids the Attack.
Redirect	Changes the Attack target according to the card text.
Negate / Cancel	Stops a card or effect according to the card text.

Attachment

- Each Hero has 2 Attachment Slots.
- A card becomes an Attachment if its effect remains active after being played and must persist for later timing.
- An effect that resolves immediately is not placed in an Attachment Slot.
- A slot must be available before playing a card that requires an Attachment.
- Attachments move with the Hero during Reposition.
- Use the same counter to track remaining turns or uses.
- When the effect ends, is used up, or the Hero is defeated, the card goes to Discard.

Casting

Target lock
Casting locks a target position, not a Hero. Choose an opposing position when Casting is played. When released, the Casting hits the Hero currently occupying that position.

- If the target position contains a Legacy Card when Casting is released, the Attack resolves without dealing damage.
- All Casting is released and resolved only during the Battle Phase.
- Casting uses an Attachment Slot and makes the user Hero Exhausted.
- If the user Hero changes position or is affected by Stun before release, the Casting is canceled.
- Normal Casting reduces its counter at the start of the next Battle Phase.
- When the counter reaches 0 during the Battle Phase, the Attack is released and the opponent receives a Response.
- After Casting resolves, the user Hero remains Exhausted until the next Draw Phase.

SUPPORT REFERENCE

11. Status and Healing

Status remains attached to a Hero and moves with it during Reposition. Legacy cannot receive Hero Status.

Status Effects

Status	Effect
Bleed	The Hero cannot receive healing while Bleed is active. Bleed does not deal additional damage.
Burn	If a Hero with Burn takes damage from an Attack, that Attack deals 10 additional damage.
Freeze	The Hero cannot change position through normal Reposition or Skill effects, and cannot use Dodge.
Poison	Deals 10 damage during the owner Hero's End Phase for each turn of its duration.
Stun	The Hero cannot be chosen as the user or source of a Skill, Item, Event, Ability, or active effect while Stun remains active.

Status Duration

Duration decreases during the owner Hero's End Phase and the Status ends when its duration reaches 0. Poison deals damage before its duration decreases.

Healing

- Healing cannot exceed Max HP.
- Single-target healing requires a damaged Hero without Bleed.
- For multi-target healing, Heroes at full HP, defeated Heroes, and Heroes with Bleed are skipped.
- Apply Healing Done and Healing Received modifiers when applicable.

Note

Taunt is an Attachment effect that restricts Attack choices; it is not one of the Status effects listed above.

QUICK REFERENCE

12. Quick Reference

Topic	Short rule
Win	Defeat all 3 opposing Heroes.
Deck-out	Lose only when a mandatory Draw Phase draw cannot be made.
Turn	Draw > Deploy > Battle > Reform > End.
Area of Attack	Left: Left/Center; Center: all; Right: Center/Right.
Range	Must choose a target without normal Area of Attack restrictions.
Position	Limits Attack targets during the Battle Phase; cards outside the Battle Phase are not position-restricted unless stated.
Reposition	The Hero moves with HP, EXP, Status, Attachment, Casting, and Exhaust.
Tribute	Convert 1 Skill into EXP during the Reform Phase.
Rank Up	300 EXP to Rank II; 700 EXP to Rank III. All EXP Cards go to Discard when Ranking Up.
Attachment	2 slots per Hero; used when an effect remains active after the card is played.
Legacy	Use the required Skill as a cost to resolve a Legacy Ability during Deploy or Reform.
Racial Token	Maximum 2; use at most 1 during one active turn.

Three Main Flows

Attack

Choose card > choose Hero > choose target > pay Mana > Response > resolve.

Rank Up

Tribute > gain EXP > reach 300/700 > move all EXP to Discard > replace Hero > gain bonus.

Defeat

HP 0 > check defeat-prevention effects > Hero defeated > choose Legacy.

Hand and Search

- Hand is private.
- After searching or viewing the Main Deck, shuffle it unless a card states otherwise.
- A draw effect takes as many cards as are available, including 0, without causing an immediate loss.
